

Reading a pattern

1. Major points of interest

2. Minor points of interest

Ex: center of arcs, Point furthest left / right / up / down

3. Feature hints

4. Pattern continued to next line

Bend radius guide

When an aluminum strip is bent around a round object, it will retain a shape larger than the original object. For each dowel size shown below, the arc drawn around the circle represents the actual shape the strip will retain after bending it around that dowel.
